DECLARATION OF DR. GREGORY L. STAHL

Sir:

I, Gregory L. Stahl, declare as follows:

1. I, Gregory L. Stahl, Ph.D., am an inventor of the subject matter of the above-identified patent application and I make this Declaration in support of that application. I am an associate professor in the Department of Anesthesia Research Laboratories of Brigham & Women's Hospital, Inc. in Boston, Massachusetts.
2. Hybridoma 3F8, 2A9, and hMBL1.2 were deposited on December 4, 1998 with the American Type Culture Collection (ATCC) as ATCC Accession Nos. HB-12621, HB-12620, and HB-12619, respectively, under the terms of the Budapest Treaty.

The ATCC is a depository affording permanence of the deposit and ready accessibility thereto by the public if a patent is granted. All restrictions on the availability to the public of the material so deposited will be irrevocably removed upon the granting of a patent. The material will be available during the pendency of the patent application to one determined by the Commissioner to be entitled thereto under 37 C.F.R §1.14 and 35 U.S.C §122. The deposited material will be maintained with all the care necessary to keep it viable and uncontaminated for a period of at least five (5) years after the most recent request for the furnishing of a sample of the deposited hybridomas, and in any case, for a period of at least thirty (30) years after the date of deposit or for the enforceable life of the patent, whichever period is longer. Applicants acknowledge its duty to replace the deposit should the depository be unable to furnish a sample when requested due to the condition of the deposit.

I, Gregory L. Stahl, declare that all statements made herein of my own knowledge are true and that all statements made on information and belief are believed to be true, and further, that these statements were made with the knowledge that willful false statements and the like so made are punishable by fine or imprisonment, or both, under Section 1001 of Title 18 of the United States Code, and that such willful, false statements may jeopardize the validity of this document and any patent which may issue from the above-identified patent application.
